Solair® Pro II Retractable Awning

The Solair Pro II is the ultimate solution for beautiful, stylish shade. Available in a wide range of fabrics, customizable sizes and modern frame color choices, the Pro will create a more finished, personalized look to your customers' outdoor oasis.

Standard Features

Frame: Corrosion-resistant, electrostatic powder-coated aluminum.

Arms: The Advanced Belt Technology that's included in this model, features an exclusive tension transmission system which incorporates our ABT that has been tested and proven for almost 2 decades on performance. This design does not stretch or breakdown over time, keeping your fabric taut for years to come.

Hardware: The Pro II is manufactured with durable stainless steel, corrosion-resistant fasteners. Finished look with protective caps and covers to hide most exposed hardware.

Pitch: Adjustable locking awning pitch from 5° to 60° for maximum shade control.

Performance: Earned TUV Certification for its quality, durability and workmanship.

Front Bar: Extruded aluminum front bar engineered for long-lasting strength and durability. Front bar features a rain channel to prevent water from gathering. Dual action front bar attachment increases flexibility and reduces strain on arms during wind gusts.

Roller Tube: Galvanized steel roller tube provides greater strength and less deflection. (Use of a center support may still be recommended.)

Styling

Frame Colors: White, Beige, Bronze, Black

Fabric Options: Hundreds of fabric choices from Sunbrella® and Dickson®.

Available Sizes

Widths: Custom 8 feet to 30 feet. All units greater than 26 feet wide will be spliced and shipped in two pieces requiring some field assembly before installation.

Projections: 5 feet, 7 feet 4 inches, 9 feet, 10 feet 6 inches, 11 feet 6 inches, 13 feet

Motorized Operation

We recommend that the Solair Pro II unit be motorized, for ease of use. We offer three standard RTS motor options based on the size of the unit (see order form for details). Hand held remote allows awning operation with the touch of a button from 65 feet away.

Some motors are available with a manual override option (CMO) for added safety in case of power loss.

Motorization also allows for additional electronic options such as wind and sun sensors.

Optional Features

Remote Control: Allows awning operation with the touch of a button from up to 65 feet away (standard on motorized awnings).

Protective Hood: Protects fabric and motor while providing a finished look.

Awning Assist Brace: Removable brace engineered to add support and stability to any Solair retractable awning.

Valance: Choose from traditional wave edges to modern straight lines.

Valance Plus: Screen or solid fabric unwinds from front valance to provide additional shade and privacy.

Semi Cassette: Available on units up to 22 feet wide and up to 11 feet 6 inch projection.

Additional Information

Solair XP Units allow for greater projections in narrower spaces. Ask a sales representative for more details.

Solair awnings can be mounted to the structural part of most buildings. Different types of brackets are required in certain applications. Contact your Trivantage sales representative or a Solair Technical Specialist for help in determining the best bracket for your application by calling 877.899.1680 or e-mailing us at: help@solair.com.

Warranty	10-year limited warranty on Solair Pro II framework. 10-year limited warranty on Sunbrella shade fabrics. 5-year limited warranty for specialty and decorative shade fabrics. 5-year warranty on Somfy motors. All warranties are good from the day of purchase. Complete warranties can be found online at Solair Shade Solutions Extranet.
----------	--

RTS Motor Installation Requirements

If the installation consists of multiple RTS motors, only one motor can be programmed at a time. All other motors must be disconnected. This will avoid interferences during the initial programming of each motor. The mounting distance between any two RTS motor heads should be no less than 19 inches to avoid possible interference.

The motor cable should not act as a direct conduit for water to enter the head of the motor. Note: Somfy motors conform to IP44 requirements and as such must be protected against direct weather elements such as rain, sleet, etc. In order to avoid water penetration, form a “drip loop” with the power cable and use a hood when required.

Solair®, Sunbrella® and Dickson® are registered trademarks of Glen Raven, Inc. Somfy® is a registered trademark of Somfy Systems, Inc.

Solair® Pro II Awning Covers

Save fabrication time! We offer quality covers for the Solair Pro II. Covers are offered in any standard pattern of Sunbrella® and Dickson® awning fabric. (Other fabric styles upon request.) All Pro covers are sewn with Tenara® thread.

Replacement covers and valances are available by special order. Please contact a Trivantage associate for details.

Warranty	10-year limited warranty on Solair Pro II framework. 10-year limited warranty on Sunbrella shade fabrics. 5-year limited warranty for specialty and decorative shade fabrics. All warranties are good from the day of purchase. Complete warranties can be found online at Solair Shade Solutions Extranet.
----------	---

Solair®, Sunbrella® and Dickson® are registered trademarks of Glen Raven, Inc. Tenara® is a registered trademark of W. L. Gore and Associates.

Solair® Pro II Valance Plus System

The Solair Pro II Valance Plus System is a vertical roll-down drop valance option that provides protection from the setting sun. A standard 4-foot vertical fabric drop from the front bar is optimal for western exposures.

The Valance Plus System consists of a cassette and a drop valance fabric (valance fabric sold separately). The design of the cassette also accommodates a standard fixed valance. The Valance Plus cassette is available in white, sand, beige and bronze frame colors. The system is only available for the Pro unit with projections up to 10ft 2in and widths up to 20ft. Allow for additional delivery time.

Warranty	10-year limited warranty on Solair Pro II Valance Plus framework. Fabric warranties will vary but most have 5 or 10 year limited warranties.
----------	--

Solair® is a registered trademark of Glen Raven, Inc.

Solair® Pro II Valance Plus Fabric

Solair Pro II Valance Plus Fabric is supplied for use in the Solair Pro II Valance Plus System. The fabric is available in widths from 10 feet to 22 feet, with a standard drop of four feet. Available in 90% Textilene® in five stock colors (Black, Brown, Beige, Grey and Desert Sand).

Solair® is a registered trademark of Glen Raven, Inc. Textilene® is a registered trademark of Twitchell Corporation.

Solair® Comfort Retractable Awning

Made with the same quality components as the Solair Pro, Solair Comfort offers the best value in a shade system. Your customers can fully enjoy their outdoor spaces with this easy-to-use, retractable awning. It adds beauty, reduces energy bills, and protects furniture from harmful UV rays.

Standard Features

- Frame:** All aluminum frame components are electrostatic powder coated to provide a corrosion-resistant, high quality finish.
- Arms:** Arm control features double galvanized steel cables, wrapped in PVC for corrosion resistance and long life.
- Hardware:** Durable, die-cast arm construction.
- Performance:** Earned TUV Certification for its quality, durability and workmanship.

Front Bar: Front bar attachment has dual-action feature that increases flexibility and reduces strain on the awning during a wind gust.

Styling

- Frame Colors:** White and Beige.
- Fabric Options:** Hundreds of fabric choices from Sunbrella® and Dickson®.

Available Sizes

Widths: 11 feet 9 inches, 15 feet 6 inches, 19 feet 3 inches.

Projection: 10 feet 2 inches.

Motorized Operation

Simu CMO motor features override winding eye and hand crank. Handheld remote included with motorized option. Allows awning operation with the touch of a button from up to 65 feet away.

Optional Features

- Wireless Wind Sensor:** Automatically retracts awnings upon detection of damaging winds.
- Awning Assist Brace:** Removable brace engineered to add support and stability to any Solair retractable awning.
- Protective Hood:** Protects fabric and motor while providing a finished look.

Solair® Power Screen

Revamp your customer’s space with the click of a button so they can enjoy the outdoors on their terms. The Solair Power Screen transforms residential and commercial outdoor spaces into comfortable, ventilated, pest-free environments, protected from harmful UV rays. Solair Power Screens are motorized, manual operation may be available on some sizes. Each Solair Power Screen is custom-designed and fabricated to fit the shape and design of the structure. When not in use, the screen retracts out-of-sight and blends stylishly with the building’s exterior.

The SRS (Side Retention System) Power Screen is widely known as the highest performing screen system on the market today. The key to the superior functionality of the SRS is its fully retained fabric inside of aluminum side rails. The design creates a tight fit and long lasting performance.

With the increase in popularity of clear vinyl and fabric enclosures utilizing the Power Screen SRS, there are added precautions that you need to be aware of. When these screens are deployed, it is imperative someone observes the deployment of each screen (we do not recommend putting more than one screen per channel on a remote control). Operation in conditions in which wind and/or cold temperatures are present can result in the screen encountering a stall. Please consult your Trivantage sales representative on all clear vinyl and fabric enclosures.

Specially designed housing cassettes in three sizes allow product widths from 4ft to 25ft, and drops from 3ft to 20ft. Additional sizes may be available if needed. Consult your sales associate for additional information.

Offered in a variety of screening and shading options to suit your customer’s needs.

When lowered in the summer months, Solair Power Screen fabrics will reduce air conditioning costs.

During cooler weather, the Solair Power Screen can be kept open to allow the sun’s warmth to penetrate the interior.

Utilizing the latest technology, many Solair Power Screen fabrics are not only fire retardant, but industry leaders in puncture, tear and mildew resistance. Manufactured with the highest grade aluminum and nylon components, Solair Power Screens stand up to the toughest environments.

Power Screen frames are available in eleven colors: Black, Bronze, Brown, Desert Sand, Gray, Green, Tan, Navajo, Silver, White, Bright White. Custom colors are available at additional cost.

Motorized operation is recommended for all screen installations for quick deployment or retraction when needed. Motors offered are matched to the torque required based on fabric and frame weight.

Warranty	10-year limited frame warranty. Proper installation techniques must be followed to ensure long-term performance. Improper installation techniques will void warranty. Please consult your sales representative for installation guidelines.

Solair® Vertical Curtain

The Solair Vertical Curtain provides an economical way to offer your customers a retractable vertical shade. These shades can reduce cooling costs and keep the heat outside the home. Perfect for both residential and commercial applications such as patios, gazebos and storefront settings. The system includes roller tube, gear, winding brace and mounting hardware.

Standard Features

Frame: Made with electrostatic powder coated aluminum and galvanized steel components for a strong but light weight unit.

Winding Brace: Available in 24 inch, 57 inch, 65 inch (standard), or 77 inch.

Styling

Frame Colors: White, Beige, Bronze.

Available Sizes

Frame kits are available in widths from 4 feet to 20 feet.

Motorized Operation

Optional motorized operation available and recommended for ease of use.

Optional Features

Remote Control: Allows you to operate curtain with the touch of a button from up to 65 feet away.

Protective Hood: Protects fabric and motor while providing a finished look.
