Accepted Media

We accept files on CD, DVD, and USB and also have an FTP available for file uploads. When submitting files online we suggest using a file sharing tool such as Dropbox or WeTransfer. If you have any question or need help formatting your files correctly, please contact us.

Order Requirements and Artwork Guidelines

- Image resolution must be 300dpi or higher. Please do not submit images pulled from a website, as these images will likely be low resolution and unusable.
- If you have a color you need to match, include a sample of that color or a PMS number for us to match to.
- Dimensions must be clearly noted for all orders, as well as contact info, and any other written instructions.
- Make sure you have a copy of your file.

Vector Art Setup

- For vector based files be sure to convert all fonts to outlines or include the font files separately.
- Make sure all images are embedded in the file or include the image files separately.
- Files should be in RGB or CMYK working space with no color profiles embedded.
- EPS or AI files are preferred for vector files.

Raster/Bitmap Setup

- Preferred file formats for raster/bitmap images are PSD, TIFF or PDF. We cannot guarantee color accuracy of JPEG images due to the compression of the color gamut.
- File resolution should be 300dpi or higher.
- Files should be in RGB or CMYK working space with no color profiles embedded. For best results, CMYK is preferred.
