Bullion Fringe – Blended Polyester

Made with thicker twisted yarns, bullion fringe adds an extra layer of depth when compared to standard fringe. Bullion trim fringe is constructed from polyester (98% spun polyester, 2% texturized polyester) for excellent outdoor performance and lasting looks.

Use the unique fringe trim for decorative pillows, umbrella trimming, or upholstery functions where a bold look is desired. Polyester Bullion Fringe offers a clean, versatile embellishment.

Sold in full rolls only.

503022

Sunbrella® Awning Braid – 13/16 in. – No. 4015 European Style

A Sunbrella Acrylic braid with exceptional color retention. "European Style" braid is a basket weave pattern where as standard braid is a straight weave pattern.

The nature of braid is that the width varies according to tension. It is a constructional design that allows the braid to sew around corners and scalloped edges without puckering. At rest, the width is consistent at a minimum width of 13/16 inches.

Welt – Rubber Spray

Made from Ethylene Propylene Diene Monomer (EPDM), a dense non-marking rubber, this spray welt stays soft and easy to mold to a windshield or any other surface. With no foam to disintegrate, it lasts much longer than other weltings. It is also stronger, less likely to rip out, making it hassle free.

Item #	Style #	Color	Put Up	Size

578076

Xtreme Seal®

Xtreme Seal edge seal is a high-tech extrusion, engineered and manufactured with an advanced EPDM material. It's a closed-cell flexible material that can be glued or sewn to most materials and surfaces. The flexibility and unique design creates a three-point contact seal on most surfaces. Xtreme Seal is an ideal choice for an edge seal on all types of custom covers, such as convertible tops, side curtains, camper enclosures, windshield tops and sides, front-drop windshields, and deck seals. Sold in full rolls only.

Dabond® is a registered trademark of J. & P. Coats, Limited.

551952

Thread – Coats Dual Duty®

Dual Duty is “core”-type thread made by spinning a high-grade cotton warp around a continuous multi-filament polyester core. Low shrinkage as compared to cotton, high single end strength, stronger seams than with cotton of equivalent size, and excellent resistance to abrasion. When wet, cotton swells to fill needle holes in fabric, which reduces seam leakage.

Item #	Approx. Yards Per Pound	Average Breaking Strength	Color	Material	Put Up	Size
551952	5000	16.07 lbs.	Natural	Polyester	1-1/2 lb. cones, 5,000 yd./cone, 18/box	150

Dual Duty® is a registered trademark of J. & P. Coats, Limited.

551906

Thread – Coats Polymatic® AW (Anti-Wick) Bonded Monocord Dacron®

Polymatic AW (Anti-Wick) inhibits the capillary action that causes seam leakage. Where seam leakage would detract from the utility of the end product, specify this thread.

Item #	Approx. Yards Per Pound	Average Breaking Strength	Color	Put Up	Size
551906	3500	18 lbs.	Black	1 lb. tubes, 40/box	125
551905	3500	18 lbs.	White	1 lb. tubes, 40/box	125

Polymatic® is a registered trademark of J. & P. Coats, Limited. Dacron® is a registered trademark of INVISTA™.

551913

Thread – Coats Polymatic® Bonded Monocord Dacron®

A bonded monocord Dacron thread treated for maximum resistance to UV degradation. This thread has increased lubrication to protect the thread during the sewing process. Stronger than twisted threads, therefore a smaller thread size can be used. Less prone to ravel and knot during sewing. Its oval profile reduces exposure of thread to surface abrasion. Can be used on both sides of double needle machine.

Item #	Style #	Approx. Yards Per Pound	Average Breaking Strength	Color	Put Up	Size

540437

Thread – A&E Poly Nu Bond™ Twisted Non-Wick Polyester

Poly Nu Bond has superior strength, stretch and recovery properties and excellent resistance to chemicals, bacteria, mildew, wear and abrasion. This thread is made of quality, high tenacity, heat resistant, continuous filament yarn. Special waxes, silicones and oils are applied to lubricate the thread, reducing needle heat and increasing sewability. This also aids in the application of constant machine tension and good loop formation.

Thread – PremoBond Bonded Anti-Wick Polyester

In the performance fabrics industry, even the thread needs to outlast coarse conditions. With anti-wicking and mildew-resistant properties, PremoBond thread is perfect for high-moisture settings. Its exclusive UV dye and bonding process ensure maximum fade prevention and bleed resistance. A pioneer in the sewing thread market, its custom lubricant provides clean running for first-rate sewability. The continuous filament, bonded polyester makes it 30% stronger than leading brands.

PremoBond thread works great in outdoor and marine fabric applications, awnings and shade, filtration, tarps, slings, geotextiles, and other industrial purposes. Made in the USA.

Thread – A&E Perma Core® Polyester

A&E's Perma Core Soft Polyester thread is a premium core spun sewing thread made with a continuous filament polyester core and polyester staple wrap. The thread is an optimal choice for most upholstery, apparel, or repair projects. Regularly trusted in the workwear, denim, bedding, and furniture industries to resist abrasion, retain color, and create strong seams.

Perma Core thread is engineered for performance and sewability on both manual and automatic multi-directional sewing machines. The core spun construction provides high strength without increasing the gauge of the thread, allowing for inconspicuous stitching. Best for indoor projects such as sofas, drapes, pillows, cushions, and more.

Thread – A&E Anefil Poly® M Filament Polyester

A&E Anefil Poly sewing thread provides good overall seam strength, low moisture regain, and better resistance to UV exposure than traditional nylon sewing threads. The thread delivers excellent seam strength with fewer sewing interruptions. This is due in part to its twisted multifilament, continuous polyester construction.

This polyester thread not only maintains a consistent diameter at higher machine speeds, but it is also engineered for hassle-free sewing performance. Melding performance and elegance, Anefil Poly resists UV light and offers good colorfastness. Recommended applications include outdoor furniture, covers, commercial applications, specialty industrial, automotive, and more.

542501

Thread – A&E Anefil Nylon® M Bonded Nylon

A&E’s Anefil Nylon is a twisted multifilament, nylon sewing thread ideal for sewing a wide range of products. The thread offers abrasion resistance and excellent seam strength. The twisted multifilament construction allows for superior sewability. This bonded Anefil Nylon sewing thread also provides a consistent diameter and ply security ensuring even stitches and a smooth finish.

Recommended for use in outdoor products or applications requiring higher UV resistance. Application examples include outdoor upholstery, commercial furniture, automotive, luggage, weather protection covers, and more.

Thread – Gore® Tenara® (Original Style)

Gore Tenara Sewing Thread has unique properties. This thread is unaffected by sunlight. UV radiation will not weaken or degrade it. Polyester threads, under daily sunlight exposure will lose as much as half their strength in as little as one year, and be down to 10% of their original strength in 3 years. Tenara maintains its strength and color indefinitely. Gore Tenara Sewing Thread will outlast the fabric that it is sewn into and is warrantied to that effect. It is unaffected by canvas cleaning solutions and will not stain, rot or mildew. Dirt just wipes off. Using Gore Tenara Sewing Thread means seams that will last.

Tenara Sewing Thread Original Style is the first generation of Tenara outdoor sewing thread. The Original Style sewing thread is un-lubricated, with an elongation (or stretch) of five to seven percent.

Polytetrafluoroethylene (PTFE) is a distinct member of the fluoropolymer class of per- and polyfluorinated alkyl substances (PFAS).

FOR INDUSTRIAL USE ONLY. Not for use in food, drug, cosmetic, or medical device manufacturing, processing, or packaging operations.

552263

Thread – Gore® Tenara® (TR Style)

Gore Tenara Sewing Thread TR style builds on the features of the Original Style, but increases the choice of colors, as well as improving the sewability features. TR style comes in highly popular clear, providing a translucent thread that disappears into most fabrics, making color matching headaches go away. The patented TR style sewing thread has an elongation (or stretch) of approximately seventeen percent, making it more robust, which allows faster sewing. The TR style is lubricated with a silicone solution in all but the largest style.

Polytetrafluoroethylene (PTFE) is a distinct member of the fluoropolymer class of per- and polyfluorinated alkyl substances (PFAS).

FOR INDUSTRIAL USE ONLY. Not for use in food, drug, cosmetic, or medical device manufacturing, processing, or packaging operations.

Thread – Gore® Tenara® (HTR Style)

Tenara HTR Heavy sewing thread is made of the same material as other Tenara threads, but features a unique 3-ply bonded construction that offers several advantages:

- An “improved circular cross-section” that provides a smoother and more uniform appearance.
- Excellent sewability.
- An increased twist level, which should reduce breaks.
- Softer construction.

In addition, because of the new construction the thread is smoother on the tube, which allows for up to 15% more seam length for the same tube price as the previous HTR-style thread. The strength of the thread remains the same. This item is a replacement for Gore Tenara TR Thread #M1000HTR.

Polytetrafluoroethylene (PTFE) is a distinct member of the fluoropolymer class of per- and polyfluorinated alkyl substances (PFAS).

FOR INDUSTRIAL USE ONLY. Not for use in food, drug, cosmetic, or medical device manufacturing, processing, or packaging operations.

Thread – Aruvo® PTFE

Made from 100% PTFE, Aruvo thread lasts as long as the fabric. It is a 3-ply, bonded, twisted thread for superior sewability. Features: snap spool base which allows you to wrap the thread around the base and snap it shut so the thread won’t come loose; twisted design for better hook pickup; lower elongation; high strength for fewer knots and breaks; great for outdoor conditions; resists UV rays, weather, chemicals, mildew, fading, and rot. Use in upholstery, marine canvas, awnings, and more. Comes with a limited lifetime warranty.

When threading the needle with Aruvo, cut the thread at a 45-degree angle to avoid fraying.

Polytetrafluorethylene (PTFE) is a distinct member of the fluoropolymer class of per- and polyfluorinated alkyl substances (PFAS).

Bobbins – Coats Ultra Dee® Polyester

These bobbins are conveniently pre-wound with Coats Ultra Dee thread. Ultra Dee is a corded (twisted) thread made from a durable, continuous filament polyester. 20-33% stronger than standard lubricated sewing threads. Heat set to minimize stretch and shrinkage. Bonded finish prevents ply untwisting and minimizes fraying at the needle eye. This means improved seam quality and less mending and rethreading. Designed for demanding conditions. Uses include leather goods, outdoor goods, seat trims, footwear, luggage, furniture upholstery, and marine applications.

Bobbins – PremoBond Bonded Anti-Wick Polyester

In the performance fabrics industry, even the thread needs to outlast coarse conditions. With anti-wicking and mildew-resistant properties, PremoBond thread is perfect for high-moisture settings. Its exclusive UV dye and bonding process ensure maximum fade prevention and bleed resistance. A pioneer in the sewing thread market, its custom lubricant provides clean running for first-rate sewability. The continuous filament, bonded polyester makes it 30% stronger than leading brands.

PremoBond pre-wound bobbins are outfitted with twisted and plied yarn. Fil-Tec cross-tack technology offers a more uniform appearance for flatter seams, consistent tension to reduce puckering, and greater yield.

PremoBond bobbins deliver a clean, versatile seam to any project where colorfastness is key. The adaptable thread works great in awning and marine fabric applications slings, filtration, tarps, geotextiles, and other industrial purposes. Made in the USA.

500431

Super Seamstick/Hi-Tack Adhesive Tape

Super Seamstick/Hi-Tack is a double-faced, acrylic-based adhesive tape that is ideal for applications where resistance to UV light and excellent performance during temperature extremes are required. Used for bonding and laminating to a wide variety of cloths, vinyls, and rigid and flexible plastics. It’s also excellent for seaming Sunbrella® fabric prior to stitching and can also be used on stainless steel tubing for patterning with Canvex® pattern cloth. Leaves little or no residue on surfaces when removed.

For reference, use with Seamstick Taper Tool (#255201).

Item #	Style #	Put Up	Width
500422	1 HI-TACK	60 yd.	1 in.
500432	2263	60 yd.	1/2 in.

500428	2 HI-TACK	60 yd.	2 in.
500431	2263	60 yd.	3/8 in.

Sunbrella® is a registered trademark of Glen Raven, Inc. Canvex® is a registered trademark of Raven Industries.

500490

Tape – Vinyl Adhesive Welding

Many products not heat sealable to themselves can now be heat sealed using this tape.

Item #	Style #	Description	Put Up	Width
500490	4220	0.005 Adhesive	200 yd., 17/box	5/8 in.

500443

Tape – Curtain Strapping

This strapping is used for seam reinforcement or for retention straps for holding rolled up curtains in place. Sold in full rolls only.

Item #	Color	Put Up	Width
500443	Clear	30 yd.	1-1/2 in.

500467

Tape – Double-Faced

Rubber Double-Faced Tape is a high-tack tape, used when a higher initial tack is required. It can turn slightly yellow. Can be used with acrylic fabrics. Acrylic Double-Faced Tape offers good initial tack and is non-yellowing. It offers high long-term adhesion and is very good for all purposes, including general sail seaming.

Item #	Style #	Material	Put Up	Width
500467	J-351	Rubber	72 yd.	1/4 in.
500469	J-353	Rubber	72 yd.	1/2 in.
500476	J-456	Acrylic	72 yd.	1 in.

500403

Tape – Double-Faced Adhesive

Typical applications for this double-faced acrylic foam pressure sensitive tape include body side moldings, rocker trims, and other automotive trim components. The tape is a companion to Costa Track® and is placed in the recess on the bottom of the track for temporary tacking prior to being permanently mounted.

Item #	Style #	Color	Put Up	Width
500403	5931N	White	36 yd., 12/box	1/2 in.

Costa Track® is a registered trademark of Costa Marine Canvas and Enclosures, LLC

500435

Tape – Double-Faced Transfer

This clear acrylic tape is used to hold the cut edge of two fabrics together prior to sewing a seam. Eliminates slippage so the seam can be sewn straight.

Item #	Put Up	Width
500435	72 yd.	1/4 in.
500436	72 yd.	1/2 in.
500437	72 yd.	3/4 in.
500438	72 yd.	3/8 in.

500466

Tape – No. 463 Seam

To minimize seam leakage on sewn seams of awning fabrics. The 3/4 inch wide tape is for double needle machines. The No. 463 Seam Tape is ideal for use on vinyl laminates such as Weblon®.

The adhesive transfer tape is on a paper backing. The tape should be applied on the edge of the one piece of material to be sewn. The paper backing is then peeled off, leaving the transfer tape on the material. The other piece of material to be sewn is applied on top of the adhesive transfer tape and pressed together. Then the two pieces are ready to be sewn. As the material is being sewn, the up and down movement of the needle pulls the adhesive transfer tape into the needle holes to seal them and thus minimize seam leakage.

Item #	Style #	Put Up	Width
500465	463	60 yd., 76/box	5/8 in.
500466	463	60 yd., 48/box	3/4 in.

Weblon® is a registered trademark of Herculite Products Inc.

500591

Tape – Fabric Bond Welding

This Fabric Bond Tape uses the best in bonding technology to create clean seams. It supports the three principles of welding success: heat, speed, and pressure. The polyurethane-based welding tape is used to heat seal seams with RF (Radio Frequency) bar, Hot Wedge, or Hot Air welding equipment.

Fabric bond tape is designed for use with vinyl, polyester, and acrylic fabrics like Sunbrella®. It creates smooth, watertight seams and eliminates the need for thread matching. Use the white heat seal tape for industrial awning or marine projects.

Item #	Color	Put Up	Width
500591	White	100-yard roll, 12 rolls per box	7/8 in.
500593	Black	100-yard roll, 12 rolls per box	7/8 in.

507150

Cord – Corsair Diamond Braid Polyester

The Corsair Polyester Cord features a durable cord with good strength, excellent UV and abrasion resistance, and low elongation.

Item #	Approx. Tensile Strength	Cord Size	Put Up	Size #
507150	360 lbs.	7/64 in.	1000 ft.	3-1/2

507121

Cord – Cotton Lacing

A braided cotton lacing cord with a high-strength, low-stretch core of filament polyester for superior strength. Can be used for awning line, lacing, drawstrings and hem lines.

Item #	Approx. Tensile Strength	Color	Cord Size	Put Up	Size #
507120	300 lbs.	White	7/64 in.	1500 ft.	3-1/2
507121	350 lbs.	White	1/8 in.	1500 ft.	4

518029

Cord – Diamond Braided Nylon

This diamond braided nylon has high strength, excellent resistance to abrasion and good elasticity under dynamic load. It also works well in wet applications.

Item #	Approx. Tensile Strength	Color	Cord Size	Put Up	Size #
518029	450 lbs.	Black	1/8 in.	1000 ft.	4

506592

Cord – Premium Sash

Cotton cover, synthetic core. General, all purpose cotton sash cord used for home, recreation and industrial jobs.

Item #	Approx. Tensile Strength	Cord Size	Put Up	Size #
506592	800 lbs.	1/4 in.	1000 ft.	8

519802

Line – Cotton Awning

Manufactured from high strength cotton yarns braided over a low stretch polyester core.

Item #	Color	Cord Size	Put Up	Size #
519802	Black	9/64 in.	100 yd.	4.5

507126

Line – Ultra Awning

Made with a polyester core for greater strength. This braided line is glazed Grade “A” cotton for longer wearing life.

Item #	Approx. Weight Per Tube	Color	Cord Size	Put Up	Size #
507122	10 lbs.	White	9/64 in.	1500 ft.	4.5
507123	12 lbs.	White	5/32 in.	1500 ft.	5
507124	14 lbs.	White	3/16 in.	1500 ft.	6

507126	26 lbs.	White	1/4 in.	1500 ft.	8

507130

Line – Ultra Mason

A braided cord made of high quality cotton to assure uniform size and quality. Excellent small diameter cord for lacing windbreaks, stationaries and store awnings. Also used for drawstrings.

Item #	Color	Cord Size	Put Up	Size #
507130	White	7/64 in.	3000 ft.	3.5

518606

Rope – Diamond Braided Polyester

Polyester cord with high strength and excellent abrasion resistance. This cord has very good UV resistance. Resists acids, alkalis and moisture.

Item #	Cord Size	Put Up	Size #
518606	1/8 in.	1000 ft.	4

515517

Rope – Supreme MFP Braided

Multifilament solid braided polypropylene with abrasion-resistant smooth finish. Good strength with low stretch and excellent dielectric qualities. Resistant to rot, mildew, oil and most chemicals. This rope also floats.

Item #	Approx. Tensile Strength	Color	Cord Size	Material	Put Up	Size #
515517	305 lbs.	White	3/16 in.	MFP (Multifilament Polypropylene)	1000 ft.	6

515449

Cord – Diamond Braided MFP

Suggested uses include drawstrings, lacing cords, general utility.

Item #	Approx. Tensile Strength	Color	Cord Size	Material	Put Up	Size #
515449	250 lbs.	Black	1/8 in.	MFP (Multifilament Polypropylene)	1000 ft.	4
515450	250 lbs.	Black	1/8 in.	MFP (Multifilament Polypropylene)	3000 ft.	4

515084

Cord – Diamond Braided Nylon Utility

Suggested uses include drawstrings, lacing cords, general utility.

Item #	Approx. Tensile Strength	Color	Cord Size	Put Up	Size #
515084	490 lbs.	White	1/8 in.	3000 ft.	4

507145

Cord – Drawtite Cotton

Braided fine cotton with glazed cover and low stretch synthetic cord.

Suggested uses: cotton awning lacing and window furnishings.

Item #	Cord Size	Put Up	Size #
507145	7/64 in.	500 yd.	3-1/2

519132

Cord – Hollow Braided Polypropylene

A low-cost, diamond-braided cord. This cord is hollow – there is no filler core.

Suggested uses: barrier rope, tie-down, general marine and hardware uses.

Item #	Color	Cord Size	Put Up	Size #
519148	Black	1/4 in.	1000 ft.	8
519136	White	5/16 in.	1000 ft.	10
519134	White	3/16 in.	1000 ft.	6

519132	Yellow	5/16 in.	1000 ft.	10
519131	Yellow	1/4 in.	1000 ft.	8

515454

Cord – MFP Solid Braided Polypropylene

Made of white multifilament polypropylene. Resists acids, alkalis and mildew. Floats in and does not absorb water. Ends can be fused to prevent fraying. Versatile for many marine applications.

Item #	Approx. Tensile Strength	Cord Size	Material	Put Up	Size #
515454	750 lbs.	1/4 in.	MFP (Multifilament Polypropylene)	1000 ft.	8

519945

Cord – Neobraid® Polyester

100% high-strength polyester cord excels in awning applications and is a superb all-purpose/industrial cord. Patented InterWarp® construction withstands years of weather and sun, and does not kink, twist, or fray. Resistant to mold, oil and stains.

Neobraid Warning: Not For Personal Safety. Working loads are for rope in good condition with appropriate splices, in non-critical applications and under normal service conditions. Do not exceed working loads without expert knowledge of conditions and professional estimates of risk. Working loads should be reduced where life, limb and valuable property are involved or with shock loads, sustained loads. Never stand in line with rope under tension or directly underneath rope under tension.

Some items are drop ship only.

Cord – Neoline® Polyester

100% polyester jacket and polyester/polypropylene core offers superior strength and abrasion resistance. Ideal for awnings and everyday use. Patented InterWarp® construction knots well, is weather resistant, and is twist and fray free.

Neoline Warning: Not For Personal Safety. Working loads are for rope in good condition with appropriate splices, in non-critical applications and under normal service conditions. Do not exceed working loads without expert knowledge of conditions and professional estimates of risk. Working loads should be reduced where life, limb and valuable property are involved or with shock loads, sustained loads. Never stand in line with rope under tension or directly underneath rope under tension.

515339

Cord – Solid Braided Polyester

Braided of clean, high tensile strength polyester. Resists acids, alkalies and moisture. Ends can be fused to prevent fraying. Ideal for drawstrings and in hems of synthetic tarpaulins. Popular for boating and awning line.

Item #	Approx. Tensile Strength	Color	Cord Size	Put Up	Size #
515339	310 lbs.	White	1/8 in.	500 ft.	4
515353	620 lbs.	White	3/16 in.	1000 ft.	6
518602	750 lbs	White	3/16 in.	1000 ft.	6

515432

Cord – Solid Braided Nylon

This is one of the finest quality and best performing nylon solid braided cords. Designed for marine and industrial use, the product is constructed from high tenacity 12 strand interlocking nylon fibers, and has excellent shock load absorption qualities.

Item #	Approx. Tensile Strength	Color	Cord Size	Put Up	Size #
515432	450 lbs.	White	1/8 in.	1000 ft.	4
515433	750 lbs.	White	3/16 in.	1000 ft.	6
515434	1200 lbs.	White	1/4 in.	1000 ft.	8

516252

Rope – 3-Strand Polypropylene

Filament polypropylene rope with excellent strength to weight ratio. Will float because specific gravity is less than 1.0. Hand and lay is medium/soft, which makes this product easy to splice.

Item #	Approx. Tensile Strength	Color	Cord Size	Put Up	Size #
516252	3780 lbs.	White	1/2 in.	600 ft.	16

516210	1710 lbs.	Yellow	5/16 in.	1200 ft.	10

515218

Rope – Unmanila™ Polypropylene

This rope has a simulated manila look with performance durability of polyolefin. It is a fibrillated film fiber that has balanced construction, medium lay and moderate strength/moderate stretch. It is lightweight and buoyant, and exhibits good abrasion resistance and excellent hand and knotability.

Item #	Color	Cord Size	Put Up	Size #
515218	Tan	1/4 in.	1200 ft.	8

Unmanila™ is a trademark of Wellington Puritan Mills, Inc.

506326

Cord – Nylon Shock

Nylon covered elastic cord of synthetic rubber. Ideal for sewing in boat cover hems, lacing down boat covers, car luggage racks and fastening applications.

Sold in full rolls only.

Item #	Description	Color	Cord Size	Put Up

506354

Cord – Single Polypropylene Cover Elastic

Elastic cord of synthetic rubber, designed to remain flexible and offer dependable elasticity when needed. When using any shock cords, always make sure ends are properly secured.

Warning: Secure hooks to ends carefully. Do not overstretch cord more than 50% of its normal length. Sudden disconnect in a stretched position may cause serious injury. Keep face and other vulnerable parts of the body away from the rebound path of the cord. Wear safety glasses during tie down and disconnect. Inspect cord before use. Discard if abraded, cut or cracked. Do not use to hold any surface which reacts to wind or air movement.
